

IMMUNE PRP PRO

Health Benefits

- Support a healthy immune system*
- Support GI tract integrity*
- All-natural source of pure bovine colostrum

What is IMMUNE PRP PRO?

IMMUNE PRP PRO is an all-natural supplement comprised of bovine colostrum for supporting a healthy immune system.* From birth, bovine colostrum is the sole source of initial acquired immunity for offspring in ruminants, and contains 40 times more immune-related components than human milk. Therefore, bovine colostrum is suggested to support bodily defense systems and be a rich source of essential nutrients.

Supplement Facts		
Serving Size: 4 Capsules	Servings Per Container: 30	
Amount Per Serving		%DV*
Calories	10	
Calories From Fat	0	
Protein	1 g	2%
Colostrum (Bovine)	1720 mg	†
Typically Provides:		
Immunoglobulin G (IgG)	550 mg	†
Other Immunoglobulins (IgA, IgM)	44 mg	†
Proline-Rich Polypeptides (PRP)	80 mg	†
Lactoferrin	8 mg	†

† Daily Value not established. *Based on a 2,000 calorie diet.

Other Ingredients: Cellulose (Vegetable capsule), Silica.

Contains: Milk proteins.

No soy, wheat, egg, fish, shellfish, tree nuts, peanuts, artificial colors or preservatives.

IMMUNE PRP PRO Product Details

Bovine colostrum is the milk produced by cows for the first several days following birthing. IMMUNE PRP PRO contains pure bovine colostrum which is rich in immunoglobulins, especially IgG, as well as IgA and IgM. In addition to these immune system enhancers, bovine colostrum contains viable cells, such as neutrophils and macrophages, which secrete special proteins that fight microbes; these proteins include cytokines, lactoferrin, and proline-rich polypeptides (PRP). Research suggests that the immune factors in bovine colostrum work in concert to defend the body against pathogens and infectious agents.

Moreover, research has demonstrated that bovine colostrum works to support a healthy gut by fighting bacterial infections in the gastrointestinal (GI) tract. Another study shows that bovine colostrum directly lowers NF-kappaB in intestinal cells, the key inflammatory gene signal that is elevated during tissue destruction of the GI lining. This is imperative for healthy immunity as a weakened GI tract can give rise to a host of major health problems.

What is (and isn't) in IMMUNE PRP PRO

IMMUNE PRP PRO is a vegetarian-friendly product produced in a cGMP facility that contains pure bovine colostrum, a unique protein rich in immune-related components that are biologically transferable to humans. Immune PRP is also free of wheat/gluten, soy, tree nuts, artificial colors and preservative and contains no GMOs.

IMMUNE PRP PRO Dosing Recommendations

IMMUNE PRP PRO contains 1720mg of pure bovine colostrum per serving (4 capsules). It is recommended to take 4 capsules, twice daily, or as directed by your healthcare practitioner.
