

Annatto E

Featuring DeltaGold® Tocotrienols
Advanced Support for Heart, Liver,
and Brain Health*

Annatto E Supplementation

Annatto E delivers the power of DeltaGold® Tocotrienols, a unique source of tocotrienols derived from the annatto plant and a subgroup of the vitamin E family. These potent compounds—comprising 90% delta-tocotrienols (Delta-T3) and 10% gamma-tocotrienols (Gamma-T3)—offer distinct benefits compared to their tocopherol counterparts by their ability to penetrate more deeply into cellular membranes.* Tocotrienols have been shown in clinical research to exert superior antioxidant activity, especially in lipid-rich tissues such as the liver, brain, and cardiovascular system, making them a powerful tool for supporting overall health.* Research also shows its powerful ability to promote healthy bones by supporting reduced bone turnover.*⁹

Key benefits of supplementing with Annatto E may include:

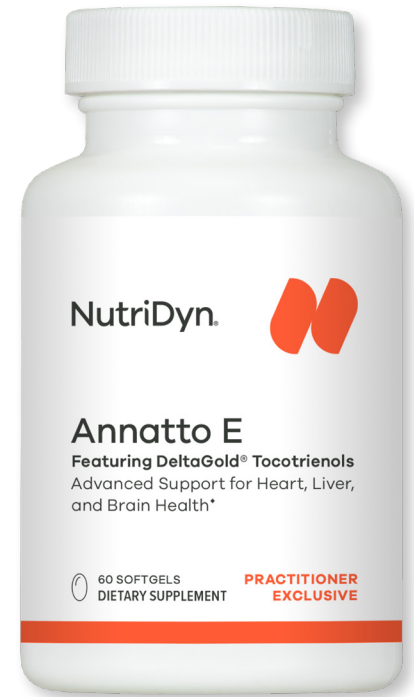

- Promotes heart health*
- Promotes healthy lipid metabolism*
- Supports healthy liver function and detoxification*
- Provides powerful antioxidant support*
- Promotes brain health and cognitive function*
- Promotes bone health through reduced bone turnover*

How Annatto E Works

Annatto E provides healthcare practitioners with a clinically supported, tocotrienol-based formula that addresses critical health concerns at a cellular level.* With its powerful antioxidant properties, ability to support healthy lipid metabolism, and neuroprotective effects, Annatto E is a highly effective supplement for promoting heart, liver, and brain health.*

Cardiovascular Health: Protecting the Heart at a Cellular Level*

Delta-tocotrienols are known to target multiple pathways in the cardiovascular system.^{1,2} Tocotrienols help support healthy cholesterol biosynthesis and promote healthy lipid profiles.* Furthermore, delta-tocotrienols promote healthy inflammatory markers by optimizing C-reactive protein and promoting optimal endothelial function, which is critical in maintaining cardiovascular health.* Their antioxidant properties also neutralize free radicals and support healthy stress response in the vascular endothelium.*

Liver Health: Supporting Healthy Detoxification and Fat Metabolism*

Tocotrienols have been shown to support healthy liver function by promoting healthy liver enzyme activity and healthy detoxification processes.*³ Delta-tocotrienols inhibit de novo lipogenesis, the process by which the liver converts carbohydrates into fat, making this formula particularly useful for patients with metabolic concerns.*⁴

Neuroprotection: Preserving Cognitive Function and Brain Health*

The neuroprotective effects of delta-tocotrienols are well-documented.^{5,6} Tocotrienols support brain health by preventing oxidative damage to neurons, promoting healthy inflammatory markers, and supporting mitochondrial function, essential for maintaining cognitive performance and neural integrity.*

Bone Health: Supports Healthy Bone Turnover*

The benefits of tocotrienols on bone health stem from their powerful ability to support healthy oxidative stress response and support bone remodeling processes.* Research has shown they can promote healthy bone calcium levels and reduce the proliferation of bone resorption cells.*^{7,8,9}

By choosing Annatto E, you are equipping your patients with an advanced tool to support vital organs and enhance overall wellness, backed by the scientifically validated benefits of DeltaGold® Tocotrienols.*
