

PRM Resolve Liquid

Pro-Resolving Mediators*

PRM Resolve Liquid provides pro-resolving lipid mediators (PRMs), which help encourage specialized pro-resolving mediator (SPM) production in the body. PRMs are metabolites of EPA, DHA, and DPA, with the most abundant metabolites being 14-HDHA, 17-HDHA, and 18-HEPE. SPMs are unique molecules that evoke novel pro-resolving mechanisms and play extensive roles in cellular defense, tissue remodeling, and organ support. ⁶1

Since SPMs are the result of PRMs, ingesting more PRMs leads to producing more SPMs. The benefits of more SPMs may include the supporting healthy blood lipids and lipid mediator profiles, promoting cardiovascular health, and supporting balanced immune responses. $^{\bullet}$ ₂₋₅

How PRM Resolve Liquid Works

The discovery of the structurally distinct families of signaling molecules—namely resolvins, maresins, and protectins, collectively termed "specialized pro-resolving mediators" (SPMs)—led scientists to a newfound interest in the mechanisms that promote a healthy immune response. As research on these unique and potent molecules has grown, it's become quite clear that they are resolving agonists with the potential to stimulate key cellular events that promote a healthy immune response. SPM production is affected by several factors, particularly nutrition, health status, genetics, and lifestyle. When the body detects an imbalance, an immune response is initiated and is followed by a resolution to the issue. Low SPM production may hinder the body's ability to effectively support a healthy immune response, thereby impacting health and well-being.

Elevated SPM requirements due to insult or environmental challenges may not be adequately met based on omega-3 status, biochemical individuality, or host lifestyle issues. *9 Including PRM metabolites along with omega-3 fatty acids is emerging as a promising modality to support the healthy formation of SPMs required for homeostasis and promote healthy immune activity. *10

PRM Resolve Liquid Supplementation

An expansive and evolving body of research suggests that SPMs play a pivotal role in supporting healthy immune responses. Since many factors impact the amount of SPMs the body produces, supplementing with PRMs is a prudent and efficacious choice for supporting immune responses in the body.

Supplementation with PRM Resolve Liquid may include these additional benefits:

- Promotes healthy immune responses
- Supports a healthy blood lipid profile
- Supports a unique lipid mediator profile
- Supports cardiovascular health[†]
- Helps support healthy omega-3 status

Form: Liquid

Serving Size: 1 Teaspoon (5 mL)

Ingredients	Amount	%DV
Calories	40	
Total Fat	4.5 g	5%*
Cholesterol	10 mg	3%*
Marine Lipid Concentrate	4.5 g	**
Total Omega-3 Fatty Acids	1,600 mg	**
EPA (Eicosapentaenoic Acid)	500 mg	**
DHA (Docosahexaenoic Acid)	700 mg	**
DPA (Docosapentaenoic Acid)	55 mg	**
Additional Omega-3 Fatty Acids	345 mg	**
Total PRMs [including	400 mcg	**
18-hydroxyeicosapentaenoic acid (18-HEPE), 17-hydroxydocosahexaenoic acid (17-HDHA), 14-hydroxydocosahexaenoic acid (14-HDHA)]		

Other Ingredients:

Highly concentrated omega-3 marine oil (anchovy, sardine, and mackerel), natural orange flavor, natural mixed tocopherols, luo han guo fruit (monk fruit) extract.

Contains: Fish (anchovy, sardine, and mackerel).

Directions:

Take one teaspoon (5 mL) daily or as directed by your healthcare practitioner.

Caution: If you are pregnant, nursing, or taking medications, consult your healthcare practitioner before use. Keep out of reach of children.

GLUTEN-FREE DAIRY-FREE

NON-GMO

PRODUCED IN A CGMP FACILITY
