

# Taking Your Heart Health to New Heights?

NutriDyn®

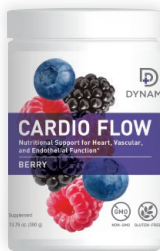

# Nutritional Support for Healthy Cardiovascular Function\*

The “heart” of a healthy body is...the heart! It is like a battery, powering all the processes of the body that are essential to life. Since heart disease is still the leading cause of death for men and women in the United States, it's no surprise many are looking for ways to support a healthy cardiovascular system.\* Dynamic Cardio Flow and Cardio Essentials Cholestin Support are designed to promote healthy heart function, a critical part of overall wellness.\*

- Would you like to support the body's natural ability to maintain healthy cardiovascular function, particularly vascular and endothelial health?\*
- Are you looking to support healthy cholesterol levels already in the normal range?\*

## Dynamic Cardio Flow

Each scoop of Dynamic Cardio Flow, a delicious berry-flavored drink, helps support healthy heart function with the assistance of folate and magnesium, along with beetroot powder and several clinically proven amino acids and herbal ingredients.\* These work together to promote nitric oxide bioavailability, healthy hemoglobin function, and healthy oxidative stress response, all critical components for healthy cardiovascular function.\*

## Cardio Essentials Cholestin Support

Sustained-release nutrients such as phytosterols, pantethine, niacin, and red yeast rice powder found in Cardio Essentials Cholestin Support help promote healthy cholesterol levels already in the normal range.\* In addition to cardiovascular health, maintaining balanced lipid components is essential to assist the body in promoting and supporting healthy operating systems, including the circulatory, endocrine, digestive, and nervous systems.\* Plus, the formula comes in packets containing two separate types of tablets to assist disintegration time, resulting in further reduced facial flushing that some may experience.\*
